Experience

UI Designer at WhiteMark Studio

March - June 2022, Boise

- Identified strengths of the brand strategy and started a user focused dynamic discussion
- Developed low-fidelity wireframes to establish the basic layout and structure of the redesigned website
- Created personas and outlined user needs to inform our redesign process
- Engaged with project manager and other designers to collaborate on preferences and pain points of the design system and layout

Marketing Associate at Frame of Mind Counseling Center

June 2019 - April 2021, Enid

- Conducted a competitive analysis to understand local industry trends
- Collected qualitative and quantitative data to inform design decisions and validate proposed solutions
- Created interactive prototypes and reviewed with key stakeholders
- Lack of a MVP was unsuccessful but with data-driven creation and refinements we managed an organic CTR of 16%

Projects

Improving the strike efforts of SAG-AFTRA

July 2023, Arizona State University

Created a visually engaging poster, showcasing a blend of creativity and usability. Proficiently utilized Figma and Photoshop, impressing my creative design thinking and visualization professor.

Tesla Enterprise & Environmental Reports

July 2023, Arizona State University

Created a series of pitches and documents, showcasing a blend of statistical analysis and visual wow. Proficiently utilized Pitch, comprehended data heavy documents, and lead a team; impressing my graphical information technology professor.

Upcoming

Google Internship

January 2024 - April 2024

I was selected as part of ASU's global tech experience program where I will be working on real world projects with Dr. Matthew Smalls of Google. Specifically I will be studying Front End and Back End Development.
